ert è una sedia in sette pannelli giuntati in massello nero ebanizzato. Composta da una semplice seduta attorniata da un nastro che da gamba si evolve in spalliera.

Tale fascia lignea è supportata da una piede centrale. Il comfort della spalliera, più bassa per continuità con i braccioli, è garantito da una fresatura a mezza luna.

ert è un sottile omaggio al neoplasticismo olandese in una chiave di contemporanea e controllata semplicità.

ert is a wooden chair composed of seven ebonized boards. A slender band encompasses the square seat. Supported by a central post, the band twists from the legs to the low, half-moon carved backrest.

In the spirit of Dutch Neoplasticism, ert is a tribute to graphic simplicity.
